

Addressing Supervisory Problems In Addiction Treatment

This 2-day course builds upon "Clinical Supervision I: Building Chemical Dependency Counselor Skills." Participants will review the frameworks presented in the first course and then move on to consider issues key to the delivery of professional treatment for substance use (and other co-occurring mental disorders) such as:

- **Learning Plan & Supervisory Interview**
Preparing to use the ORAL model for giving and receiving feedback, the learning Plan and the Supervisory Interview effectively.
- **The Corrective Interview**
Increasing engagement of employee to improve their work when performance problems emerge. This section provides a format for conducting a corrective interview and role playing to increase confidence.
- **Ethics and Professional Boundaries**
Focusing on preparing clinical supervisors to effectively manage ethical dilemmas. Scenarios, as well as real personal experiences, will be presented for discussion.
- **Facilitating Change**
Facilitating change in an agency to accommodate new treatment methods or best practices. Guidelines for developing a strategy to introduce change in your agency will be presented. *The Change Book* will be introduced as a tool for developing an effective change process.

CLINICAL SUPERVISION II: Addressing Supervisory Problems in Addictions Treatment

Objectives:

Participants in this course will:

- Understand the importance of first-hand observation by the clinical supervisor,
- Improve personal ability to give effective job performance feedback,
- Become familiar with strategies to help engage employees to improve their work,
- Learn to effectively manage ethical dilemmas, and
- Understand strategies to introduce change into an agency.

Short presentations, demonstrations, small group activities and role-play practice are all incorporated into this fast-paced experiential workshop.
